

Amendments to the Specification

Please replace the paragraph on page 7, lines 9-17 of the specification with the following paragraph:

Mii Technologies, LLC also produces other insulated metal powders from which flux path closure device may be fabricated. Insulated metal powders from which flux path closure device 24 may be fabricated are also available from HÖGANÄS AB, Sweden, such as a soft magnetic composite "SMC" (an iron powder encapsulated in an insulating material) under the trade name SOMALOY™ 500 soft magnetic composite or SOMALOY™ 550 soft magnetic composite. Suppression of eddy currents can also be achieved using other known techniques such as by fabricating the flux path closure device 24 from laminated layers of iron. Flux path closure device 24 may be fabricated from other materials within the scope of the disclosure.
